Re: Innovations and Technological Development, Docket No. E-00000J-13-0375

Commissioner Bob Burns requested comments on innovations that could impact our current energy utility model in Arizona to be filed on January 17, 2014. As an interested stakeholder, the Arizona Independent Scheduling Administrator Association (AISA) is willing to offer information relevant to the subject of transmission as the Docket progresses. Initially, the AISA is not submitting any specific comments, but stands ready to participate in future workshops if the subject matter warrants such.

For more information on innovations and customer efficiency and other energy options in various markets, see the 2014 Annual Baseline Assessment of Choice in Canada and the United States (ABACCUS) market structure report that will be released and will be available next week at: <http://defgllc.com/publications/consumer-choice/>. There will also be a media call where Commissioners or Staff can listen in next Wednesday.

Thanks for the opportunity to participate in this Docket regarding such important topics as increasing the innovation in our industry.

Vicki Sandler
Executive Director, AZISA
